

Retail Management

SCQF LEVEL 6 MODERN APPRENTICESHIP

 11 Month Programme

This qualification gives learners the opportunity to develop and demonstrate occupational competence in retail management job roles.

Introduction to the course

This qualification is for candidates working within the retail industry who have more experience, are in a role with more responsibility or have been identified as individuals with the potential to progress within the organisation.

Learner outcomes

This qualification covers areas such as stock management, finance, planning, and organisation. The wide range of optional units reflects the diversity of the sector and the multi-channel nature of the modern retail business.

Assessment

Assessment is through performance in the workplace and will be based on performance evidence, i.e. observation (in person, video recordings) and work products generated by the candidate (word-processed documents, letters, spreadsheets, receipts, e-mail correspondence, database reports, graphic elements, etc.). The specific evidence produced will depend on the choice of optional units.

A good fit for

This qualification is for candidates who work within the retail industry as a supervisor, team leader, shift leader, assistant manager or a trainee manager.

What's next?

Upon successful completion, learners could progress to further professional and academic development; for example, a Higher National Diploma (HND) in Retail Management or employment in the retail sector, in a team leader/supervisor, customer-facing role.
